DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 09/01/2005 have been fully considered but they are not persuasive. Examiner disagrees with applicant's interpretation of the meaning of the word: "fastener": First: According to the Merriam Webster's Collegiate Dictionary (10th edition, 1997) the word: "fasten" is defined as: "to make fast and secure", or "to fix firmly or securely", or "to fix or set steadily", or "to take a firm grip", or "to take a firm grip or hold"; and the noun of the word "fastening" is defined as: "something that fastens: FASTENER", (see page 423 of the Dictionary). Second: Shinotou teaches, that: "Based on a reaction force of the plate springs 78 and 79 restricted by the contact part 71 of the lever 72, the heat sink 58 and the semiconductor device 56 are securely fixed to the socket 54" (col. 8, lines 15-18). Such a function of the springs 78 and 79 perfectly complies with cited above fastener's functions. Hence, the previous rejection stays.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-22, 25-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Shinotou.

Art Unit: 2835

Shinotou teaches a cooling apparatus 50, Figs. 5-6C, adapted for insertion (connection) to a socket 54 of a chip board 52, said chip board comprising a CPU 56, and said cooling apparatus comprising: a heat sink 58 having a base 76 positioned atop the CPU 56, wherein said heat sink base comprising a hole 75; a cooling fan 60 positioned atop the heat sink; an electrical connector 80 of said cooling fan 60, said electrical connector 80 being inserted in a predetermined position through said base hole 75 and adapted to be connected to a corresponding electrical connector 53 on a face of the chip board 52. Shinotou teaches furthermore said heat sink base having two mechanical fasteners - clamps 78 which are adapted to engage with corresponding mechanical fasteners 71 of the chip board and induce pressure on the base 76, wherein when said fasteners 76 are engaged with the fasteners 71 the electrical connector 80 of the cooling fan 60 is engaged with the corresponding electrical connector 53 of the chip board 52.

Regarding to the claims 25-29: The method steps are inherently necessitated by the device structure as Shinotou discloses it.

Allowable Subject Matter

- 4. Claims 23-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 5. The following is a statement of reasons for the indication of allowable subject matter: At least one spacer positioned between the heat sink base and the chip board, said spacer providing a gap between the base and the chip board.

Art Unit: 2835

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael V. Datskovskiy whose telephone number is (571) 272-2040. The examiner can normally be reached on 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Feild can be reached on (571) 272-2092. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
